December 22, 2014.

Dear Dr. Stefano Marcelli, we noticed that your paper "Gross anatomy and acupuncture: A comparative approach to reappraise the meridian system" is very interesting. We respect you as a pioneer in this field.
Yours sincerely,

Kwang-Sup Soh, PhD, Editor-in-Chief of the *Journal of Acupuncture and Meridian Studies* - Elsevier.

Curriculum Vitae

Dr. Stefano Marcelli was born November 11, 1958 (age 58) Lives in Darfo Boario Terme, Brescia, Italy - Via Caravaggio 7 – km 56 from Orio Airport, and km 100 Linate Airport - Milan Center.

Degree in Medicine and Surgery summa cum laude, University of Bologna six years 1976-1982 – (thesis on Genetics: *Sister Chromatid Exchange*); Predoctoral position in Anatomical Pathology, University of Bologna, one year 1980;
Specialization in Clinical Psychology summa cum laude, University of Bologna three years 1982-1985 (thesis on Dermatology: *Psychosomatics of Psoriasis*);
MD Officer in reserve, rank of Captain, Military Hospital of Verona, Department of Clinical Psychology, one year 1985-1986;
MD Assistant, Local Health Unit Bergamo, Department of Hygiene and Disease Prevention, one year 1997-1998;
MD Assistant, Local Health Unit Brescia, Department of Toxicology and Drug Addiction, one year 1999-2000;
Mesotherapy training in Paris, France 1982-1995;
Medical Acupuncture and Traditional Chinese Medicine training in France, Italy and China 1982-1995;
Private practice for Pain-Chronic Diseases Treatment and Ecologic General Medicine since 1986. **General Practitioner** 2004-2013.
Founder of *Italian School of Mesotherapy*: <http://www.meso.it> (2002), and *Scientific Acupuncture*: <http://www.scientificacupuncture.org> (2011).

Published Books (in Italian)

- *Handbook of Mesotherapy* Minerva Medica, Turin 1990 - 1997
- *Parallel Medicines* Cortina, Turin 1993 - 2002
- *Pocket Acupuncture* Nuova IPSA, Palermo 1994 - 2001 (more than 10,000 copies sold)
- *The Active Points Test* Cortina, Turin 1995
- *Yellow booklet contains instructions healthy to die* Erga Edizioni, Genoa 1996
- *Female god raped in the wood* (novel) Fazi Editore 1997, translated into German (19)
- *Mother of All* (novel) Fazi Editore 2003
- *The Active Points Test - Needle Contact Test* - Hoepli, Milan 2010 (Hoepli is the first Italian publisher of handbooks for schools)
- *New Handbook of Mesotherapy* - Hoepli, Milan 2013 (as above) translated into Greek (2016)

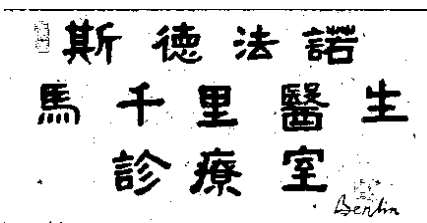

Published Books and Articles (in English)

- "The Active Points Test." Singing Dragon, Jessica Kingsley Publishers – London • Philadelphia, 2015.
<http://singingdragon.com/the-active-points-test.html> Preface of Ioan Dumitrescu and David Alimi
- Founder of the comparative anatomical approach to research in acupuncture, first to apply scientific method to investigating the Acupuncture Meridian System (since 2008). The first peer-to-peer article on this subject is: "Gross Anatomy and Acupuncture: a Comparative Approach to Reappraise the Meridian System." *Medical Acupuncture*. Mary Ann Liebert Publishers, New York 2013.
OPEN ACCESS: <http://online.liebertpub.com/doi/full/10.1089/acu.2012.0875>

All the new scientific observations on the Acupuncture Meridian System made according to comparative anatomical approach are collected in the website www.geneticacupuncture.com.

Dr Stefano Marcelli also realized an app for iOS and Android devices on the [Acupuncture Daily Qi Flow Circuit](#).

Spoken languages: Italian (mother language), English B2, French C2, German A2.

February 10, 2017
Stefano Marcelli

Research interests (in order of importance)

1. Producing and publishing articles/books about evo-devo biology, with special attention to a possible existing "correlation" between the development of senses and muscles of face in different vertebrates, and the simultaneous development of internal organs as suggested by comparative anatomical approach applied to research in acupuncture.
2. Studying human and comparative anatomical approach in Traditional Chinese Medicine (a book-draft nearly completed, to be revised, exists on the subject).
3. Realizing two experiments, relatively simple and low cost, to prove or disprove whether the Acupuncture Meridians System described by Chinese scholars of 1600s exists or not as a micro-electromagnetic structure, with its fulcrum in the Sino Atrial Node, and involved in vertebrate morphogenesis together with—AND INSEPARABLY FROM—the cellular/genetic component.
4. Speculating about the couple "vacuum/electric current" as an intrinsic physical force of living beings, extrapolated from the findings of Baglivi (1668-1707), Galvani (1737-1798), and recently the American well renowned physiologist Arthur Guyton (1919-2003). <http://www.meso.it/Guyton-Greatest-Discovery-01.mp4>
5. Investigating the concatenation of causes that starts and maintains Androgenetic Alopecia.
